# PEDIATRIC CARE

## WHY CHOOSE A FAMILY DOCTOR FOR YOUR CHILD'S CARE?

### FULL LIFE CYCLE CARE

Family medicine is the medical specialty that provides continuing, comprehensive health care for both the individual and the family. Family medicine integrates the biological, clinical and behavioral sciences, and encompasses all ages, both sexes, each organ system and every disease process. As family doctors, we specialize in the care of patients from birth throughout the whole life cycle.

### EXPERIENCED IN PEDIATRIC CARE

Over the course of our three-year medical Residency, family doctors receive training in inpatient and outpatient pediatric settings, including hospital Neonatal Intensive Care Units (NICU), Pediatric Emergency Departments, and inpatient care of children in pediatric hospitals.

### CARE WITHIN THE CONTEXT OF THE FAMILY

Family doctors are committed to full-family care. We believe that the care of children is best provided within the context of the whole family. Knowing all the family members, the family dynamic and family history can help us provide better care for your child.

There are many strengths unique to family medicine. For example, we are well-

trained in managing the parent and newborn relationship. We see the mother and baby as a connected unit needing holistic care, beginning with breastfeeding and continuing throughout infancy.

Another benefit to choosing the family medicine model for your child is that we can provide continuity of care into adolescence. Having a familiar, trusted doctor can be beneficial in helping navigate the particular health challenges of teens.

### URGENT CARE AVAILABILITY

We at Northwest Primary Care are committed to providing same-day appointments for urgent issues for your child, as well as Saturday clinic hours. Our scheduling policy means you can see us when you need us. An on-call doctor is always available for phone consultations, 24/7. We can also consult with physicians and staff at Emanuel Children's Hospital and Doernbecher Children's Hospital, as needed.

### PRENATAL CARE

Our board-certified physicians are known for personally delivering their patients' babies. This kind of dedicated care is what sets us apart from other practices. Our doctors are committed to your child's optimal physical, mental and social health, offering the kind of nurturing care you want for your child.
