

To schedule a Telehealth  
Appointment call  
503.659.4988

## **To our patients,**

We hope you are well, and for those who are not, we hope you are getting better.

We are ready to offer Telehealth services. New government regulations are now allowing easier access to our clinics, through video-based HIPAA-secured access. The majority of our Practitioners are able to offer this access now, with the remaining being able to do this the week of March 23.

**If you would like to have a video-based visit with your Medical Practitioner, please call us to schedule. Our schedulers will make an appointment for this video visit.**

There are some basic requirements: you need a computer or smart phone with a camera. We will need your email address to send you the link for the appointment. If you are connecting through a smart phone, you will need to download the Zoom app. You have to reside in Oregon.

Our business office will contact you to discuss your insurance's coverage of these visits (more and more are offering coverage).

We believe we will be able to take care of you via telehealth for many of your needs. There are a few exclusions though; we will not be doing well-child visits, complete physicals, worker's compensation, or motor-vehicle accident injuries by video. If the Practitioner decides during this video visit that you need to be seen in the office because an exam needs to be done, we will help you schedule that appointment. We can still order your lab tests during these visits. We can prescribe or refill your medications.

We look forward to continuing your medical care.

David McAnulty, M.D.  
Medical Director
